

1/21 COVID Update

Hello All,

This message contains some important COVID updates and information, specifically about travel, the vaccine, and quarantine. Please take a moment to familiarize yourself with these updates, and feel free to reach out with any questions.

Vaccine Information

While the actual rollout of the vaccine is still in progress, more information about the vaccine is available and the city has developed a tool to keep individuals informed.

- To sign up to receive notifications about your eligibility for vaccination, ***see [this link](#)***.
- For information about the vaccine itself, as well as plans for distribution, please see the PDFs attached to this message.

SF Shelter-in-Place/Travel Advisory

The city's shelter-in-place order has specific prohibitions against non-essential travel and the gathering of individuals from outside a single household. These are enforceable city mandates; as such, they supersede our internal policy (found [here](#)). Below is a summary of the most relevant info.

- Travel: ***all non-essential travel is prohibited***. If anyone leaves the 9 Bay Area counties (defined in the document linked) for non-essential reasons, a 10-day quarantine is required upon return to San Francisco. You can see the travel order [here](#).
- Household Restrictions: ***The gathering of individuals from multiple households is prohibited***, with exceptions as defined in the order [here](#) (in appendix C-2).

Updated Quarantine and Isolation Instructions

The CDC and the city have reduced the quarantine period from 14 days to 10. To provide further clarity for specific circumstances, the city has released the documents below.

- [How to quarantine your child if they have close contact with someone with COVID.](#)
- [Information on quarantine vs. isolation updated](#)

Support Tool For COVID-Positive Individuals

The SF Department of Public Health has sent out information regarding a new virtual tool to help those who are COVID-positive get support quickly and efficiently. You can find more information on this tool in the PDF attached.
